

There are between

6,000–8,000

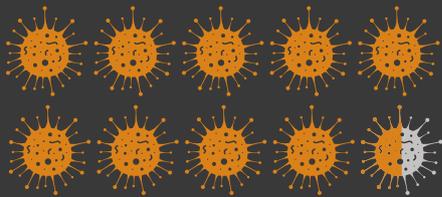

known rare diseases¹

80% are caused by a genetic condition¹

95%

of rare diseases don't have an approved treatment drug

and yet they impact more people than cancer and AIDs

COMBINED²

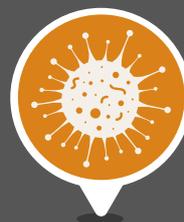

people in the UK will be affected by a rare disease at some point in their lives¹

350 million people have a rare disease¹

and if they all lived in one nation it would be the 3rd most populated country in the world³
